🐙 github.com/lets-code404 🏆 [credly.com/yashanshrastogi](https://www.credly.com/yashanshrastogi)

B.Tech (CS/IT) student and software developer building AI-driven, scalable systems with experience in machine learning, backend development, and cloud technologies.

</> Skills

Data Structures & Algorithms (C++)

Python

JavaScript

React.js

Node.js

Express.js

MongoDB

Machine Learning

TensorFlow

REST APIs

Git

📁 Projects

Nexora 🔗

Offline Voice Controlled OS Interface with Local LLM Integration

03/2026 – Present

- Built a voice-controlled OS interface enabling real-time automation of 40+ system commands via speech and text inputs.
- Integrated offline STT & TTS pipelines and local LLM (Ollama) using multi-threaded architecture for low-latency, privacy-first performance.

GenAI Applications 🔗

Career Compass & Gemini Decode

10/2024 – 09/2025

- Built and deployed generative AI applications using Streamlit and prompt-based workflows for career guidance and text analysis.

ML Projects 🔗

Computer Vision & NLP Models (CNN, LSTM, GAN)

09/2024 – 10/2024

- Developed machine learning and deep learning models including handwritten digit recognition (MNIST), image classification (CIFAR-10 using CNN), and sentiment analysis on IMDb reviews using LSTM.
- Applied supervised learning and neural network architectures using TensorFlow, PyTorch, and scikit-learn for image and text data processing.

🎓 Education

B.Tech in Computer Science & IT

Dr. APJ Abdul Kalam Technical University

10/2023 – Present | Greater Noida

10th & 12 th from CBSE

Ramjas Sr. Sec.School

04/2020 – 06/2022 | New Delhi

📁 Experience

Frontend Developer Intern

ByteEdu 🔗

11/2024 – 01/2025

- Developed and optimized React-based UI components, improving performance and user experience.
- Integrated REST APIs to enable dynamic data rendering and seamless frontend-backend interaction

🏆 Awards

Agentic Premier League – Champion 🔗

Google Cloud

2026

Built and deployed real-time applications (Live IPL scoreboard & finance assistant) on Google Cloud under time constraints

AI Rocket Badge 🔗

Microsoft Learn

2024

Top 15/300 in a Microsoft-led AI program for developing ML solutions.

🔧 Tools

- Git & GitHub
- Google Cloud Platform
- Streamlit
- Ollama
